I am a full-stack web developer with over 4 years of experience building static websites and web applications using Javascript, React, Next, Express, and Node. I am passionate about building accessible, responsive, SEO-compliant web apps and performant, secure, scalable REST web APIs.

SKILLS

Languages: JavaScript, TypeScript

Front-End: React, Next

Back-End: Next, Node, Express, MongoDB

Development Tools: Git, Jest, Bruno, Figma

PROJECTS

Express Web API | [node-express-mongo](#)

- A production-ready web API built with Express and Mongo using the MVC pattern on the Node Runtime
- The project summarizes my knowledge of these tools with guidelines I use to launch other projects.
- Technologies: Node, Express, MongoDB, Mongoose

React Docs | [react docs](#)

- A summary of the React's state, state updates, state management, state preservation, managing side effects, optimizing renders and the React Router library.
- Technologies: ReactJs, Tailwind CSS

EDUCATION

Riara University, Nairobi — *B.Sc. Computer Science*

July 2022

- **Relevant Coursework:** Web Development, Databases Architecture, Object-Oriented Programming, Networking, Software Development Life Cycles, Operating Systems Principles, Data Structures and Algorithms, Artificial Intelligence.

EXPERIENCE

ICT Authority, Kenya | Intern — *Applications Developer*

January 2023 - December 2023

- Designed and deployed a state corporation's website on the Konza cloud.
- Maintained the website by managing the changing content and branding requirements.
- Technologies: Drupal, Odoo, Javascript, React.
